Dec 18

To: I.canamero, m.lewis4, You (oscardarpla96@gmail.com)

Dear all,

### 1) CW2:

as discussed with you during my last lecture, I have extended the deadline to hand in CW2 by 5 days, to 10th of January (the expected date to return marks is also moved by the same number of days), and I have added the option to do the coursework either individually or in pairs. I have added further explanations (and re-written some of the old text) to reflect this change, so please read the CW description carefully, particularly if you decide to work in pairs. Please note that everyone will need to give a demo individually, so that we can assess each student's understanding of the coursework.

Things have not changed for the students who decide to do CW2 individually, but I have added further explanations to what needs submitting, following a request for clarification (see below), so please re-read the CW2 description document as well.

The explanations added to what needs submitting is to answer a question that was asked to Matt last Thursday, asking him to pass it on to me; namely, clarifying what type of explanations we expect regarding the architectures of the robots, so that we can assess your understanding of them.

For the demo, I have requested the use of E300 from 13:00 to 16:00 on Thursday 11th January 2018, but I am still awaiting confirmation of availability. I will email with further details as soon as I have confirmation. Please let me know by email if that date would pose a serious problem for you, such as clashing with an exam (only for serious issues that would prevent you from attending, please).

### 2) CW1 marks:

Regarding CW1 marks, that I was intending to release last Friday (given the date adjustment following the submission deadline extension that I gave), please accept my apologies for the small delay, as I was unwell with a terrible cold for most of last week. I am hoping to release marks and feedback tonight or tomorrow Tuesday at the very latest.

### 3) Worksheets weeks 9 and 10:

Many thanks to all those who provided feedback on the week 10 worksheets, we really appreciate it. A comment appeared a few times that some students could still not see clearly the links between lectures and practical sessions, despite our efforts to make it clear (e.g. in the Module Guide timetable, providing explanations on how each practical related to the previous lecture on the exercise sheets), so we'll definitely need to come up with more clear solutions. I will be keeping those worksheets so that we can better reflect on the feedback. Everyone had 2 marks on that worksheet.

I guess Matt will be handing back the marked worksheet for week 9 at the demo.

Finally, nobody came to ask questions during my office hours last Thursday, so I assume people are mostly doing fine, but if you have questions, please email me this week, either with the question or if you need an appointment. I will be on leave and away from email between December 23rd, 2017 and January 8th, 2018.

Best wishes,

Lola

The University is the UK's leading business-facing university and an exemplar in the sector. It is innovative and enterprising and challenges individuals and organisations to excel. The University of Hertfordshire is one of the region's largest employers with over 2,650 staff and a turnover of almost £233 million. With a student community of over 27,200 including more than 2,800 students from eighty-five different countries, the University has a global network of over 175,000 alumni. It is also one of the top 100 universities in the world under 50 years old, according to the new Times Higher Education 100 under 50 rankings 2012.
